

Automatic bollards have been installed in the city of Bucaramanga, in Colombia, in accordance with the 'Walkable City' plan

Various automatic bollards provide safety and establish a safe flow of pedestrians and vehicles in the city of Bucaramanga, which has a great historical heritage.

The project has been carried out within the framework of Plan C of the 'Walkable City' initiative, and is one of the first of its kind in the country.

The constant improvement and evolution of our products may result in some modifications of the technical specifications and characteristics of the products without prior notice.
