

In June 2023 the Pallady Bridge was opened on the A2 motorway, known as the sun motorway, connecting Bucharest and Constanta. There we installed suspended Deco Catenaria light fittings that illuminate the space from the iron deck that covers it.

The Deco Catenaria belongs to the Essentials family. With an elegant design, it features perfect glare control.

The constant improvement and evolution of our products may result in some modifications of the technical specifications and characteristics of the products without prior notice.
