

Removable Flexible with polyethylene base

HFLEXMP

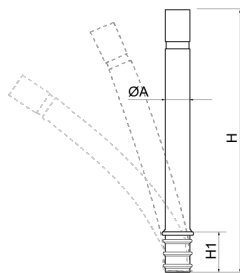

Mobile bollard made of flexible polyurethane in black (optional in red, green, yellow, or blue), resistant to UV rays, with a reflective band. Embeddable base made of black polyethylene.

It is manufactured in fixed or mobile variants with bases of polyurethane or stainless steel. Also available in a version with a base for screw installation. It withstands a bending of 1500 cycles at 45° and 50 cycles at 90°, without damage. "E" classification for fire behavior, according to standard UNE-EN 13501-1:2007+A1:2010.

Resistant to -50° according to standard UNE ISO 812.

Recommended anchoring: Through embedding of the base.
