

## Bronze Sculpture in Girona

Benito Artis has created, manufactured, and installed the bronze sculpture of Josep Ensesa Gubert, visionary of the urban complex of S'Agaró exactly a century ago.

S'Agaró, jewel of the Baix Empordà, celebrates its centenary with the inauguration of a statue in honor of its visionary creator, Josep Ensesa Gubert (1892-1981). In the process of manufacturing the statue of Josep Ensesa follows a meticulous approach from beginning to end. It all begins with a single photograph, carefully selected to capture the essence of the honoree in one of his most representative moments. From this image, advanced technology is used to create an accurate three-dimensional model, ensuring fidelity to Ensesa's gesture and expression. Every detail is meticulously reviewed and refined before moving on to the production stage. Benito Urban, experts in the field, take the mold and work with artisanal skill to bring the bronze statue to life. This artisanal process ensures that every feature, every line, is an authentic representation of the visionary creator of S'Agaró.

The inauguration of the statue coincides with an outdoor exhibition that tells the story of this urbanization and its iconic coastal path, allowing visitors to immerse themselves in its architecture, geography, and cultural life. In addition, guided group tours are offered to delve deeper into this rich history.
